

General properties of DENACOL ACRYLATE

◆ General properties

Items / Grade	DA-141	DA-314
Chemical name	Epoxy Acrylate from Phenol	Epoxy Acrylate from Glycerol
Features	Low viscosity	Multi functional
Appearance	Light yellow liquid	Yellow ~Light yellow liquid
Color (GARDNER)	1	2
Viscosity (mPa · s /25°C)	220	11,000
Acid Value (mgKOH/g)	5	10

◆ Chemical Structure of DA-141 DA-314

Packaging

DENACOL ACRYLATE DA-141 / DA-314 are available in:

- ◇ 20 KG Can
- ◇ 200 KG Drum

Handling and Storage / Other information

Follow the handling precautions and recommendations stated in the Safety Data Sheet (SDS)

Storage in tightly sealed original containers under cool and dry conditions inside a warehouse is recommended.

All persons who use, handle, transport or store these materials need to avoid exposure to them. Adverse health effects from skin irritation to more serious effects can result from the improper use of these materials. Use protective gloves, eye protection shields or safety glasses, and skin creams or lotion. Avoid direct prolonged exposure.
